### ISON's Slingshot Toward the Sun

Comet Ison  
zombie phoenix  
like Icarus flew toward our sun.  
Dusty, rocky snowball from Oort Cloud  
flashed tail  
shone bright  
last hurrah?

At first  
believed survived  
hailed as "Comet of the Century".  
Spacecraft and telescopes watched its progress  
close encounter  
too hot  
few remains

Comet , cats  
many lives?  
Tale watched avidly on the Internet.  
Cosmic crumbs, Oort orts , comet debris--  
parts survived.  
passed gas  
spewed dirt.

"Like cats  
have tails  
and do precisely as they want"  
says David H. Levy about comets.  
Screen smudge  
light streak--  
then poof.
