

## Compound Word Verse

### Super Stars

Across the universe sparkling  
our life-source creating Earthling  
born starseed.

Celestial unravelers  
generating space-travelers–  
borne stardust.

Energy explodes Milky Way  
Super-novae blasting light-spray–  
show star-bursts.

Illuminating cosmic dark  
space-time fabric light-sewing mark  
of star-shine.

Begetter of live and love's dreams  
companion of hope's moonbeams  
is starlight.

**Compound Word Verse:** Invented by Margaret R. Smith.

Five 3-line stanzas (triplets or tercets).

Rhyme Scheme: a-a-b

Syllable Count: 8-8-3

The compound word in the last line of each stanza must share the same word stem.  
In this poem it was star.
