

Alouette

To Spray or Not to Spray

Spray the roof bee hive?
Zap so none alive?
But are we not short of bees?
They're too high to sting.
Can't hear the buzzing.
Can't you leave them alone, please?

You say that we should.
They'll destroy the wood.
The honey will attract swarm.
The way that you tell
is the hive will swell
but only burst if too warm.

It's Oregon's lot
to rarely be hot
so let the bees make honey.
If they can survive
and their life style thrive
many lives will be sunny.
