Dragon: Unmanned Spacecraft

First International Space Station cargo delivery flight of dozens SpaceX plans to make for NASA

Dragon connected to the space station--
flawless performance for world-wide space fans
built by Elon Mush, a billionaire
for private SpaceX , not from NASA's fund.
Obama's space program gets a reboot.
NASA's time/budget problem gets re-route.
SpaceX- creative. NASA moribund?
Dragons, spacecraft, space junk filling the air.
Now missions manning Mars and outward plans.
A multi-planet species has begun.
