

Sijo

Most of the multiverse we do not understand or see--
with dark energy, dark matter, subatomic particles
waiting to be discovered, known and brought into the light.

Sijo:

1. A Korean form.
2. Three lines. Each 14-16 syllables long.
3. No meter or rhyme.
4. Normally the first line sets the scene. The second line adds a twist or change. The third line resolves the first two lines sometimes in unexpected ways. Gives a sense of finality.
5. Sometimes the three lines are split into six lines to make it easier to read.
