Exploring the Higgs Field

- 9a Minuscule particle Higgs Boson
10b spins in on its axis like globe, alas
11c in a different pattern than other small ones
12b it's supposed to explain why particles have mass.
- 9a Tinier than microscopes can see
10b Atlas detects pieces' signatures . Learn
11c if Standard Model predictions are correct,
12b making discoveries in collisions at CERN.
- 9a Laymen call it the God Particle,
10b though the scientists do not claim it so
11c Is boon like DNA for biology
12b this is a massive leap in what we want to know.

Tango:

Introduced by Chiquita LoJuana Gonzolas Sills

1. Syllable Count: 9-10-11-12 quatrain.
2. Rhyme Scheme: a-b-c-b
